

YOUR COMFORT SPACE

## Why choose silvertend

Silvertend is the professional solution for any kind of event, suitable for inside/outside spaces.

Made of quality materials and with a functional design, fully equipped and replacement parts, guarantees reability and endurance, and **transforms every place into your comfortable space.**

- Resistant
- Simple
- Equipped
- Customized

## Resistant

Its Structure, that is made of thick anodized aluminum, guarantees lightness and solidness to the gazebo and its die-cast aluminum feet with triangular section increase its stability.

There is guarantee of protection both of the cloth from the contacts with the internal sliding elements and of your hands from accidental strokes, thanks to the nylon joining parts, to the spacers between the profiles and to the claddings on the section bars of the support legs.

Its PA fabric is waterproof and has toughened fittings. The assembly is simplified and safe, thanks to the security buttons that allow the locking of the profiles upon opening or closing.

*These are the main features that make Silvertend resistant and durable.*

**SILVERTEND YOUR COMFORT SPACE**

# Simple to assemble

The assembly is quick and easy and takes place in less than a minute, without using any tools, following 4 steps,

# Company

**Silvertend** is designed and made by Al Fibra Globe  
Established in 1990.

Al Fibra works in its industry thanks to the experience gained during the early stages of its activities. Initially a family run business, Al Fibra Globe has developed marked production skills concerning hand-crafted manufacturing of aluminium, iron and other types of metals and it is in step with the times evolving in the aluminium manufacturing industry.

Nowadays Al Fibra Globe is a well-known company dedicated to the industrial production of aluminum articles for trade on public areas and stores.

Its products, are made with attention to the smallest details in order to guarantee long life, high performance, complete functionality along with the ability to fully satisfy any economic or qualitative needs according to the safety laws. Moreover, Al Fibra Globe has acquired many moulds

to assemble accessories and aluminium profiles: searching for the newest best solutions, the factory is able to produce all items on customers specific requirements from the beginning of the manufacturing, and it is the one and only firm capable to offer the best product diversification on the market.

The Company policy is firmly oriented to the principles of seriousness and professionalism: constantly upgrading tools and machinery, the whole production process maintains the highest European standards guaranteeing top quality (EC certified). Nowadays, Al Fibra Globe works in Italy and also in the international areas collecting excellent references.

Al Fibra Globe in continuing effort to satisfy customers needs in order to achieve a mutual target has improved its Management System that now meets well-defined standard requirements obtaining ISO 9001:2008 certification.
