SLOPING

WHY CHOOSE SLOPING

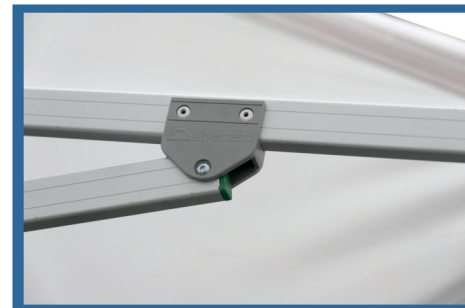

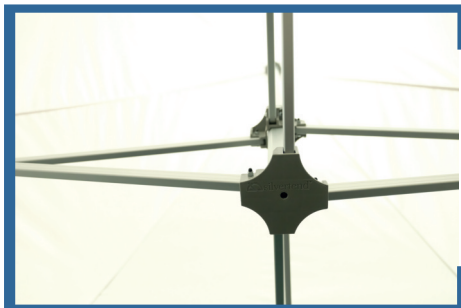

The Sloping gazebo is a variation of the silvertend model in pagoda version. Thanks to its awnings, It gives the possibility to expand the perimeter covering without increasing the basic size by improving the covering capacity of your gazebo and making it more visible from a distance.

Silvertend is the professional solution for any kind of event. suitable for inside/outside spaces.

It is Made of quality materials and with a functional design, fully equipped and with spare parts and it guarantees reability and endurance and transforms every place into your comfortable space.

SIMPLE TO ASSEMBLY

The assembly is quick and easy and takes place in less than a minute, without using any tools, following 4 steps.

Its structure, that is made of thick anodized aluminium, guarantees lightness and solidity to the gazebo and its die-cast aluminium feet with triangular section increase its stability

There is guarantee of protection both of the cloth from the contacts with the internal sliding elements and your hands from accidental strokes, thanks to the nylon joining parts, to the spacers between the profiles and to the claddings on the section bars of the support legs

Its PA fabric is waterproof and has toughened fittings. The assembly is simplified and safe, thanks to the security buttons that allow the locking of the profile in the process of opening or closing

Made in Italy

These are the main features that make silvertend resistant and durable
